

Your learning goals for ISA 401?

Being able to proficiently use R and clearly represent my data in easy to understand visualizations.

I want to learn PowerBI

I want to learn how to effectively utilize R to clean and analyze data sets. I also hope to learn which visualizations work for different data types.

How to optimize visuals to increase user engagement and understanding.

I am looking forward to learning how to create data visuals to be able to use them in my future career in data analysis.

I am looking to learn how to use Tableau and PowerBI in visualization applications. I am also interested and learning about data mining as it is not something I have learned about yet.

How to better analyze and interpret large amounts of data, gathering insights from this data, and presenting these insights

I want to have a deeper understanding of how to best analyze and understand data, as well as getting familiar with Power Bi and how to use it for data visualizations

Your learning goals for ISA 401?

How to create/interpret various data visualizations; how to clean data for analysis/use

Gain a better understanding of different data visualization methods and become more comfortable with various software

better understand different coding software and how it can be applied in a real world setting

Become more comfortable with interpreting data and the way its presented/visualized

to gain confidence in my abilities to gather correct, clean data and find ways to gather useful insights from it

be able to effectively use a variety of data sets.

Gain a true understanding of how to interpret data visualization beyond just knowing the numbers

I want to feel more confident in my abilities to read and extract data in a way that allows me to better understand trends and then better rely what the data discovers

Your learning goals for ISA 401?

how to make professional visualizations for any topic/industry & as well as become confident in coding enough to remember the basics from heart

Improve my ability in data manipulation while also being able to clean and show data in a correct way.

Master the use of business intelligence and data visualization in organizations.

To learn more about the power of AI and other tools for data visualization.

I want to learn how to best analyze, represent and interpret the data I work with in class and the future, while also understanding the statistics I see every day.

I want to sharpen my analytic skills so I can feel confident in my post grad job. learn more about tableau. I want to learn how to properly extract and analyze data efficiently

Learning how visualize data to make my point clear to the reader

Interpret data more efficiently so that I can make better decisions in my future career

Your learning goals for ISA 401?

get better at tableau

Gain experience using
data visualization
software

Adapt to different data
visualization programs and
know the most effective
method of visualization for
different data sets.

I would like to learn how to
use these topics to apply
them for future careers,
specifically how we could use
them in a future job.

I want to strengthen my R
understanding and continue
to grow in tableau
